## **DETAILED ACTION**

### ***Current Status of 10/563478***

1. Claims 1-2 are currently pending in the current examination and are being examined in the current action.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Barte et al. (US 4,599,375, issued July 8, 1986, included in IDS). Barte et al. report the compound of claim 1 on the top of column 2.

4. Claim 1 is objected to as it fails to end with a period. See 37 CFR 1.75 and MPEP 608.01(m). Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Allowable Subject Matter***

5. The following is a statement of reasons for the indication of allowable subject matter: Berte et al. (EP 126454, issued 28 November 1984) teach the preparation of piperazine pyrophosphate from the mixing of piperazine and sodium pyrophosphate (see page 8, preparation of acid piperazine pyrophosphate). This reference does not anticipate or render obvious claim 2 because the final product is made from piperazine phosphate.
